

Vladimir Evdokimov

Senior Software Engineer

job@evladimir.com | github.com/vladimir-e | 929-331-7278 | Brooklyn, NY

Being an independent contractor for most of my career, taught me to operate in chaotic environments. Though, I prefer the structure of the SCRUM framework over chaos. I find that skills such as ownership, independence, and focus on the end-user serve me well in the startup/corporate environment, as well.

I'm looking for a role where I can apply and continue to grow my knowledge in Software Architecture.

EXPERIENCE

Paintzen

Senior Software Engineer | Aug 2019 - Current

As part of a SCRUM team, I work on maintaining and growing our ecosystem of microservices that composes our b2b products and internal tools. I write code every day. I participate and initiate meetings where architecture decisions are made. I keep track of the code quality, technical debt, and documentation.

Additionally, I assumed the role of Tech Lead. My responsibilities are removing technical roadblocks and providing technical direction to my team.

Tech stack: TypeScript, Node, Nextjs, React, Mongo, AWS, Serverless architecture

Independent Contractor

Full Stack Software Developer | 2011 - 2019

Worked on multiple long-term contracts in startups and small distributed teams. globomd.com, tabarnapp.com, and other partnerships verifiable via upwork.com

Tech stack: Ruby, Elixir, JavaScript, PostgreSQL
